

Why?

Invisible Infrastructure

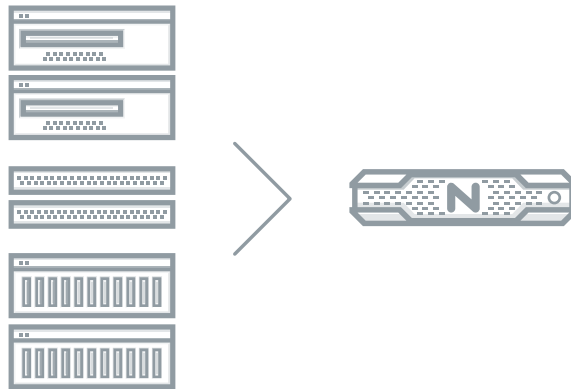

Nutanix is on a mission to make datacenter infrastructure invisible, elevating IT to focus on applications and services

What?

Hyperconvergence

Nutanix natively converges compute, storage and virtualization into a turnkey hyperconverged solution that can be deployed in 30-60 minutes, and runs any app at any scale

How?

Web-Scale

The Nutanix Xtreme Computing Platform is uniquely built using web-scale technologies and architectures that originated in large Internet companies such as Google, FB and Amazon and delivers cloud-like agility and lower costs
