

Pylon Pro

For Lotus Notes®

Experience the full power of Lotus Notes on a mobile device, including remote access to corporate email, calendar(s), contacts, task lists, memos, expenses AND custom Notes applications. Corporate directories, sales force automation, inventory and field service applications can be instantly deployed on mobile devices — with no programming. Pylon Pro lets you sync your handheld device to your desktop to greatly improve effectiveness and individual productivity without requiring the involvement of corporate IT departments or development resources. Mobility has never been so powerful, so robust and so simple.

The Full Power of Lotus Notes on Your Mobile Device

With Pylon Pro mobile users can improve their productivity with access to any Lotus Notes business application, database or PIM content through a desktop computer and cradle. PIM information is accessible through native applications on Palm OS or Pocket PC devices. Pylon Pro also provides access to discussion databases, journals and multiple address books and calendars.

A Seamless Extension of Lotus Notes

Pylon Pro extends your existing Lotus Notes infrastructure, leveraging Lotus Notes security. Individuals are automatically authenticated against the Lotus Domino® directory for simple setup and administration with no demand on IT resources or special access to Domino servers necessary — it simply uses existing Access Control Lists (ACLs). Pylon Pro also provides a simple Notes database so users can configure, filter and control access to data sources. Existing Notes applications can be deployed instantly saving time and money, and providing a greater return on your existing Lotus Notes investment.

iAnywhere™
A SYBASE COMPANY

FACTS AT A GLANCE

Uses standard Palm OS or Pocket PC PIM applications

- Supports document and spreadsheet email attachments* on Palm and Pocket PC
- Supports repeating appointments, including custom repeating meetings
- View discussion databases or Notes Journal in the Palm Memo pad
- Provides access to multiple databases, specifically the following:

PIM Applications	Palm OS	Pocket PC
Calendar/Datebook (personal and group calendars)	5	5
Address Book/Contacts (personal and corporate)	5	5
Email	3	1
Memos/Notes	5	0
To Dos/Tasks	5	5
Expenses	5	0

*Requires DataViz Documents -To-Go on Palm

KEY BENEFITS

- Improve productivity with remote access to Lotus Notes applications, custom databases and PIM data
- Greater return on Lotus Notes investment
- Simple to deploy desktop solution for individuals and workgroups

Simple operation and end-user configuration

- Users can use standard filters or create custom filters using Notes formulas
- Re-sorts and re-sizes data in custom databases to display the most relevant data
- Full "Find" support in custom databases

Robust Security

- Full support for Lotus Notes security models using existing ACLs
- Supports encrypted mail
- Supports Notes 'More secure Internet password'

Easy administration and management

- Pylon desktop setup requires no additional IT resources
- All configuration done in Lotus Notes

Access critical information anywhere, anytime, in any language without any re-programming effort

- Converts custom Lotus Notes applications into fully functional handheld applications
- Synchronizes devices from multiple desktops (Palm only)
- Access via desktop cradles
- Delivers information in any localized Notes language supported by the Palm OS or Pocket PC device
